

Datasheet: Large Roll of Construction String

Product Overview

This large roll of construction string is an essential tool for various construction and masonry tasks. Made from durable nylon material, it offers high tensile strength and flexibility, making it suitable for demanding construction environments.

Key Features

- **Material:** Nylon, known for its resilience.
- **Versatility:** Ideal for a range of applications including bricklaying, foundation pulling, hammering tasks, and floor tile installation.
- **Large Roll:** Comes in a substantial roll, ensuring you have ample string for extensive projects.
- **Thick and Long:** Specifically designed to be thicker and longer, providing enhanced durability and usability.

Applications

- **Bricklaying String:** Used to ensure straight and level brickwork.
- **Foundation Pulling String:** Assists in aligning and leveling foundations.
- **Hammering String:** Useful in tasks requiring precise alignment and marking.
- **Floor Tile Installation:** Helps in laying tiles evenly and accurately.

Technical Specifications

- **Small Roll Option:** 100 meters in length, 1 millimeter in diameter.
- **Material Strength:** High-tenacity nylon ensures the string can withstand significant tension and repeated use.
- **Color:** White, providing good visibility against various backgrounds.
